Adarsh Kumar Dubey

Full Stack Developer

India | 7355456550 | dubey1310adarsh@gmail.com

Professional Summary

Computer Science undergraduate targeting Full Stack Developer, Software Engineer, Node.js Developer, and Java Developer roles. Hands-on experience building responsive web applications with React.js, JavaScript, Node.js, Express.js, Java, MySQL, and MongoDB. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, DBMS, and REST APIs. Comfortable integrating APIs, designing reusable UI components, working with relational and NoSQL databases, and debugging production-style issues. Currently expanding backend skills in Spring Boot, Hibernate/JPA, and JDBC for enterprise Java development.

Technical Skills

Languages: Java, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Vite, Tailwind CSS, React Router, Context API, Responsive Web Development

Backend: Node.js, Express.js, REST APIs, Spring Boot, Hibernate/JPA, JDBC

Databases: MySQL, MongoDB, Firebase/Firestore

CS Fundamentals: Object-Oriented Programming, Data Structures and Algorithms, DBMS

Tools: Git, Maven, npm, Postman, VS Code, IntelliJ IDEA

Deployment: Vercel, Netlify, Hostinger

Projects

Hotel Booking Web Application
React.js | JavaScript | Tailwind CSS | Context API | React Router

- Built a responsive hotel booking web app with hotel listings, room details, amenities, image galleries, and booking-oriented UI.
- Implemented dynamic room-detail pages using React Router and URL parameters.

- Used React Context API for centralized hotel and room state.
- Created reusable Tailwind CSS components for consistent layouts across pages.
- Added interactive image galleries with selectable images and dynamic room information.
- Debugged state initialization, dynamic rendering, component imports, and URL-based room retrieval.

YouTube Tag Generator
HTML | CSS | JavaScript | REST API

- Developed a responsive web app that generates YouTube tags through an API-based workflow.
- Implemented search, request handling, and dynamic rendering of API responses in JavaScript.
- Integrated frontend logic with REST API services.
- Designed a clean, mobile-friendly interface focused on simple user interaction.

Employee Payroll System
Java | Object-Oriented Programming

- Built a Java payroll application using OOP principles.
- Implemented employee data and salary operations with classes and methods.
- Applied encapsulation, inheritance, abstraction, and polymorphism.
- Structured logic into reusable classes to strengthen Java problem-solving skills.

Target Roles

Full Stack Developer | Software Engineer | Node.js Developer | Java Developer

Primary stack: React.js, Node.js, Express.js, MongoDB, Java, Spring Boot, MySQL
